Paint Protection Film and ceramic coating do two different jobs — and together they deliver the most complete protection available. We install STEK DYNOSHIELD PPF as the impact barrier, with premium ceramic as the slick, glossy outer shield.

PHYSICAL BARRIER

Paint Protection Film

STEK DYNOSHIELD

- ◆ Absorbs rock chips & road debris
- ◆ Guards against light scratches
- ◆ Resists bug acids & fallout
- ◆ Self-healing, impact-resistant layer

SURFACE SHIELD

Ceramic Coating

APPLIED OVER THE FILM

- ◆ Increased gloss, depth & slickness
- ◆ Strong water-repelling hydrophobics
- ◆ UV protection slows film aging
- ◆ Easier washing, less spotting & staining

CERAMIC COATING

PAINT PROTECTION FILM

YOUR VEHICLE'S PAINT

The ceramic coating acts as the **sacrificial outer layer** — taking on contaminants and water spotting — while the PPF underneath remains the **impact-resistant barrier**. Together they keep your paint cleaner, glossier, and protected far longer than either alone.

NANO-DIAMOND

DQUARTZ Professional

EXTREME HARDNESS & GLOSS

- ◆ Nano-diamond surface hardness
- ◆ Exceptional reflective, wet-look finish
- ◆ Resists chemicals, UV & contaminants
- ◆ Extremely slick, easy-clean surface

ELITE SiO2

CQUARTZ Finest Reserve

GLOSS · DURABILITY · RESISTANCE

- ◆ High-SiO2 ceramic technology
- ◆ Deep gloss & enhanced paint clarity
- ◆ Resists oxidation & UV exposure
- ◆ Long-term durability with maintenance
